DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Perkins.

Perkins discloses a first region having a linear converging leading edge and trailing edge surface, a second region having a linear converging leading edge and trailing edge surfaces, and a transition region having a smooth, gradually curving surface devoid of a planform break. The regions are adapted to be coupled to the fuselage of the aircraft. The Examiner will attach a figure of the Perkins reference to show how he is treating the parts of Perkins in relation to the claims.

Response to Arguments

The examiner has used Perkins to anticipate the amended claims. This renders applicant's arguments moot.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3644

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
